# DOBLI® MIRROR

## FOR TRUCKS

WWW.GROOTJEBBINK.NL

### BLIND SPOT MIRROR

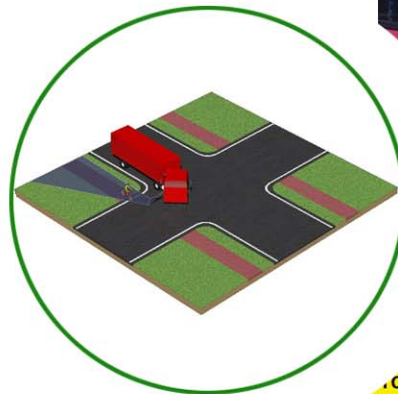

The blind spot. The dangerous angle left of the truck is often missed by drivers. To get safe on the road, it's good to **make this blind spot a seen spot**. For you, but specially for other road users – a very safe idea! There are different solutions to solve this problem. One of them is the DOBLI® mirror, which means: Dead-Blind-Spot mirror. This mirror shows the dangerous left side of the truck where most accidents happen.

#### Also for your truck

There is a mirror available for almost every kind of truck. Mounting the mirror is easy, because an easy illustrated manual is attached. It's readable in at least three languages.

Why a DOBLI® mirror?

- Increase your and other's safety
- Cheap and efficient solution
- Available for almost every truck
- Heated and unheated mirrors

GrootJebbink  
SAFETY TECHNOLOGY

angle of the DOBLI® blind spot mirror

our mirrors are adjusted correct, if you see the lines of:

- Box 1 in the Main [large] mirror
- Box 1 and 2 in the Wide-angle mirror
- Box 3 in the Close proximity mirror
- Box 4 in the DOBLI® mirror or camera, eventually in combination with the other mirrors.

then... you are seeing ALL RIGHT!

Notice: Check your mirrors daily at the adjustment location. Clean your mirrors regularly and keep your view in the cab and mirrors free.

If you would like to receive more stickers, then order them online at [www.grootjebbink.nl](http://www.grootjebbink.nl), here you'll also find the locations of the adjustment locations.
